

Our team of experts can help bring your organisation to the next level.

## Pain2Gain Discovery

**A smarter way to focus on the problem and deliver the right strategic solutions.** We use a structured approach to uncover problems and missed opportunities (pains), validate benefits if pains were resolved (gains) and design a roadmap of smart & high value solutions first. **All in one day.**

## Review & Audits

**We will review your area of concern** and table independent assessments & proposals varying from:

- System change & re-implementation
- Product enhancements or new product needs
- Business process re-engineering
- Cost reduction strategies or optimised usage of existing capabilities

## Digital Transformation

**We provide a roadmap to drive the business** from legacy environments to future proof technologies, from manual processes to an automated environment or from paper based to a digital organization.

## Technology Strategy

**With our strategic alliances,** clients can be assured of achieving their business goals, by minimizing the risks of counterproductive IT systems & technology.

## Data Management & Analytics

Forloop has invested in developing a state of the art technology platform for data analysis.

Coupled with the data management as well as MRO specific domain expertise, we are best suited to help Airlines analyse and utilise their data for optimised Strategic & Operational decision making.

## Product Development Partnership

Should your solution idea provide value to the industry, FORLOOP is open to develop best of breed products leveraging our advanced AI / ML Platform. With our pedigree in integration, these products can easily & seamlessly integrate with M&E / MRO and other systems.
