

A smarter and quicker way to deal with hundreds of Service Bulletins & Mods every month

Identify & rapidly process relevant & high priority SBs with ease.

FOR-SB will save 70% effort in your SB assessment process leaving you bandwidth you can channel into higher value work

Ditch the spreadsheets – they are so 90s! Remove human errors & clerical work.

Import with ease only what is required into your MIS.

FORLOOP

FOR-SB

A smarter and quicker way to deal with hundreds of Service Bulletins & Mods every month

Automatically read & categorise Service Bulletins as they arrive, regardless of format and complexities.

Perform automatic pre-assessment including applicability & effectivity determination. Track Turnaround and SLAs.

Generate Engineering Order Data, JIC/e-Task Card as required. Easily import into your MIS for implementation. FOR-SB supports all MIS import options.

Contact us now and let us show you how your organisation will benefit by making your inbox processing smarter.

FORLOOP has been delivering smart solutions to complex problems since 2000, using next generation tools such as Artificial Intelligence and Machine Learning.

Since 2007, **FORLOOP** has focussed on the aviation industry with a distinct aim to help airlines, MROs & suppliers. **FORLOOP Middle East** adds several decades of in-depth domain expertise, bringing better value to clients and helping to build stronger partnerships in the industry.
